

EASTERN ONTARIO CATHOLIC DISTRICT SCHOOL BOARD SCHOOL BOARD VENTILATION PROFILE

School boards are optimizing air quality in schools through improved ventilation and filtration. Implemented measures are dependent on the type of ventilation and feasibility within the context of school facilities and related building systems.

MEASURES TO OPTIMIZE VENTILATION IN SCHOOLS

Ventilation: Increasing the flow of outdoor/fresh air for diluting the concentration of any infectious particles.

Filtration: Involves the use of different types of fibrous media designed to remove particles from the airstream.

SCHOOL BOARD VENTILATION STRATEGY

- Optimize air quality systems at all facilities to ensure the health and safety for all CDSBEO students, staff, and partners.
- Research and implement technologies to enhance our ventilation systems.
- Utilize all resources at our disposal to improve our indoor air quality.
- Continue frequent routine maintenance and inspections of our ventilation system to ensure optimal performance.
